AHAMMED NAJAD

WEB DEVELOPER

ABOUT ME

I am an enthusiastic MERN Stack Developer who recently completed Higher Secondary education (2023–2025). I have developed multiple full-stack projects using the MERN stack and gained practical experience in frontend and backend integration. I am seeking an entry-level role where I can apply my skills, learn from industry professionals, and contribute to meaningful projects.

EXPERIENCE

2025 – 2026

- MERN Stack Developer – Self Projects / Internship
- Duration: 08 Months
- Developed full-stack applications using MERN stack
- Created REST APIs and connected frontend with backend
- Worked with MongoDB aggregations and relations
- Used Git for version control
- Debugged and optimized application performance

EDUCATION

2023 – 2025

- Higher Secondary Education (Plus Two)
- Stream: Science
- Year of Study: 2023 – 2025
- Board: State Board
- School: PHSS PANDALLUR MALAPPURAM , KERALA

SKILLS

Frontend:

- HTML5, CSS3
- JavaScript (ES6)
- React.js (Components, Props, Hooks)

Backend:

- Node.js
- Express.js
- RESTful APIs

Database:

- MongoDB
- Mongoose (Schemas, Relationship)
- Aggregation Pipeline

Tools:

- Git & Github
- Postman
- VS code

PROJECT

Project 1: Digital Will & Asset Nominee Management System

Description:

- A secure web app to store important documents and give access to nominees after verification.

Tech Stack:

- MongoDB, Express.js, React.js, Node.js, JWT

Features:

- User login and registration
- Upload and manage documents
- Nominee assignment
- Admin verification
- Secure access control

My Role:

- Created REST APIs using Express.js
- Designed MongoDB schemas
- Managed global state using Context API
- Connected frontend with backend
- Tested APIs using Postman

Project 2: E-commerce Web Application

- Developed a full-stack e-commerce application using MongoDB, Express.js, React.js, and Node.js
- Built the frontend with Vite for fast development and performance optimization
- Designed a fully responsive UI using Tailwind CSS, optimized for mobile, tablet, and desktop
- Implemented user authentication and authorization
- Created features like product listing, product details, cart management, and order flow
- Integrated Razorpay payment gateway for secure and seamless online payments
- Developed RESTful APIs for managing products, users, carts, and orders
- Implemented admin functionalities for product and order management
- Followed clean code practices and modular architecture

Project 3: Netflix Clone Web Application

- Completed Project
- Developed a Netflix-inspired web application using React.js
- Built a clean and modern UI with Tailwind CSS
- Implemented a fully responsive layout for mobile, tablet, and desktop devices
- Integrated movie and TV show data using public APIs
- Added features like movie listing, banners, and category-based rows
- Implemented dynamic rendering and reusable React components
- Focused on UI/UX consistency similar to the original Netflix platform
